

FAHRENHEIT GLOBAL

AN INTERNATIONAL FIRE ENGINEERING CONSULTANCY

Fire Engineering

Performance based engineered solutions for your new build

With **20 years** of industry experience, Fahrenheit Global's vision is to make the world a safer place which is driven by our philosophy to do the right thing.

Fire Engineering

The Fahrenheit Global Difference

Here at Fahrenheit Global we have a vision to make the world a safer place. The company began providing fire engineering services to safeguard properties and their occupants back in 2002. Since then our motto to always "do the right thing" has held strong in all the works carried out by the Fahrenheit Global team.

With close to 20 years of industry experience, our team of registered Fire Engineers and private Fire Investigators ensure delivery of our work with minimum fuss each time. Our goal is to provide our clients with suitable access consultancy services, upgrades, checks and investigation services as they require them with our philosophy "to do the right thing" at the core of our business. Having worked on a range of significant projects across the globe, our experience, expertise, proactive attitude as well as attention to detail allows us to provide a first-class spectrum of fire engineering services.

We endeavor to always uphold our core values which focus on accountability, growth, innovation, delivering high-quality work and putting our client's needs first. These are the values that make Fahrenheit Global the business it is today.

Our Fire Engineering services are designed to ensure compliance from the get-go

With a focus on performance-based design, we provide our clients with the most suitable fire engineering solutions which comply with the relevant codes. We keep abreast of the changes and updates within the industry and we manage these as part of our client's expectations when they enlist our services.

Fire Safety Engineering at planning stage is paramount for several processes including risk assessment and to ensure maximum safety. Only a Registered Fire Engineer can provide you with the specific services required to ensure your building is up to code.

Before our clients commence their construction it's important that they enlist the expertise of our Fire Engineering Consultants.

If you are in the process of planning a project, consider us for your Fire Safety Engineering requirements.
